## EXPERIENCE

---

### Software Engineer

redBus

Feb 2022 - Present  
Bangalore, India (Hybrid)

- Contributed to the development of various features in the **redRail** mobile web funnel leveraging **React, Redux, Express, Mongo, and Scss**. Key features include [Train Schedule](#), [Coach Position](#), Route Extension, Confirmation Probability and GFT Flow.
- Helped develop and launch the redRail [Desktop funnel](#) from scratch working in a small team of 2 Engineers.
- Developed various reusable components in the **common component library**, leveraging **storybook**.
- Implemented **performance improvements** for various pages in both the redBus and redRail **mobile web** funnel. Improving **Lighthouse** scores from **40s to 80+**.
- Built an in-house **user session recording library** from scratch, enabling product teams to analyse user behaviors and feature impacts by **playing back** their **activity recordings**.
- Awarded **Trailblazer Award** for Superlative Performance in **Q3 2022-23**.

### Software Engineer

TCS

Oct 2020 - Feb 2022  
Mumbai, India (Remote)

- Implemented various bug fixes and **feature requests** for an internal Payroll Management System of Client
- Developed a **UI dashboard** for a Gas Station Chain to maintain and visualize integration of new services.
- Implemented a POC for a Project Management Project with the help of **Reactjs, Material UI and Nodejs**
- Awarded **On the Spot award** for Customer Satisfaction Index of **100 percent**

### Software Intern

Argil DX

Feb 2020 - Aug 2020  
Noida, India

- Implemented business logic and form validations for a public survey form using **ES5 JavaScript** for a major client in India using **AEM Forms** that affected **5,000,00+ users**
- Implemented custom UI for the survey forms using **HTML and CSS**
- Achieved **Employee of the Quarter** being an Intern

## SKILLS

---

### Technical Skills
